

Mathematics and Numeracy Workshop Year 1 & 2

Ysgol yr Holl Saint - All Saints' School, Gresford. Wrexham.

Exploring Early Number Through Play, Curiosity & Connection

Today is all about giving you an opportunity to see how your child learns maths in school and how powerful it can be when learning feels hands-on and interactive.

In the Welsh Curriculum, maths is about developing confident, curious thinkers who can explore patterns, make connections, and explain their ideas.

Children learn best when they can touch, build, play, and talk – and that's what you'll experience today.

You'll move around a carousel of short, interactive stations designed for you and your child to explore together.

There are no "right" or "wrong" ways to take part. The aim is to:

- See how children use concrete materials like Numicon to build understanding
- Experience the power of mathematical talk
- Enjoy learning together
- Leave with ideas you can use at home

Thank you for joining us – your involvement makes a huge difference to your child's confidence and enjoyment in maths.

We hope you have fun exploring, building, and discovering together.
