### Number Bond Awards

**Blue** To know all pairs of numbers which total 100  
(34 + 66 = 100)

**Yellow** To calculate mentally doubles and halves of multiples of 10 and 100  
(double 6 = 12 so double 60 = 120)

**Red** To use knowledge of tables to double and halve decimals (half of 5.6, double 0.34)

### Tables Awards

**Blue** Say the multiplication table in order without long pauses

**Yellow** Give the answer (product) of two multiplied numbers not in the order of the table eg. "five times two is..."

**Red** Say the two numbers (factors) which multiply together when given the answer (product) eg. "thirty is three times ten" or answer questions such as "how many tens in thirty?"

*Product* = the answer to a multiplication  $6 \times 5 = \underline{30}$

*Factor* = the numbers which are multiplied together to make the answer

$\underline{6} \times \underline{5} = 30$
