Number Bond Awards

Blue To calculate mentally doubles and halves of multiples of 10 and 100
(double 6 = 12 so double 60 = 120)

Yellow To use knowledge of tables to double and halve decimals (half of 5.6, double 0.34)

Red To know all squares of numbers up to 12 x 12
(4 x 4 = 5 x 5 = 6 x 6 =)

Tables Awards

Blue Say the multiplication table in order without long pauses

Yellow Give the answer (product) of two multiplied numbers not in the order of the table eg. "five times two is..."

Red Say the two numbers (factors) which multiply together when given the answer (product) eg. "thirty is three times ten" or answer questions such as "how many tens in thirty?"

Product = the answer to a multiplication 6 x 5 = **30**

Factor = the numbers which are multiplied together to make the answer
